BONUS · PRACTICE EXAM 1

Practice Exam 1

85 questions · 90 minutes · weighted like the real RBT exam

Exam format

85

questions · 90 minutes

Same length and timing as the real RBT exam (3rd ed.). On the real exam, 75 questions are scored and 10 are unscored pilot items you can't identify, so answer every question.

Questions by area

Area	Q	Real exam
Behavior Acquisition	21	25%
Behavior Reduction	16	19%
Data Collection & Graphing	15	17%
Ethics	13	15%
Documentation & Reporting	11	13%
Behavior Assessment	9	11%

How to use this practice exam

1. Print the answer sheet (page after the questions) or use scrap paper.
2. Set a timer for **90 minutes** and take the exam in one sitting, without notes.
3. Mark one answer per question. If unsure, eliminate options and choose the best one.
4. Check your answers with the **answer key**. Each answer has a short explanation.
5. Fill in the **score by area** table to see where to study more.
6. Review the cards of your weakest areas before taking the next practice exam.

Quick strategy

Read the last sentence of the question first: it tells you what is being asked. Underline the behavior and what happened right after it. On ethics questions, the best answer usually protects the client and involves the supervisor.

Study aid based on the public RBT Test Content Outline (3rd ed.). Not affiliated with or endorsed by the BACB.

PRACTICE EXAM 1

Questions 1–8

Choose the BEST answer.

1 **Tokens that can be exchanged for many different backup reinforcers are:**

(A) Punishers
(B) Motivating operations
(C) Generalized conditioned reinforcers
(D) Unconditioned reinforcers

2 **A coworker asks the RBT to sign the coworker's session note. What should the RBT do?**

(A) Decline and inform the supervisor
(B) Ignore the request
(C) Sign it if the coworker promises it's accurate
(D) Sign it

3 **The RBT waits 0 seconds, then 2 seconds, then 4 seconds before giving a prompt across sessions. This fading method is:**

(A) Response cost
(B) Most-to-least prompting
(C) Shaping
(D) Progressive time delay

4 **For which function is planned ignoring a form of extinction?**

(A) Tangible
(B) Attention
(C) Escape
(D) Automatic

5 **The RBT says "Touch your nose," and the client touches their nose. This is an example of:**

(A) Listener responding
(B) Echoic
(C) Tact
(D) Intraverbal

6 **To teach the word "ball," the RBT first reinforces "b," then "ba," then "ball." This is:**

(A) Shaping
(B) Discrimination training
(C) Chaining
(D) Generalization

7 **Why can time-out be a poor choice for escape-maintained behavior?**

(A) Time-out always increases attention
(B) Leaving the activity may reinforce the behavior
(C) Time-out is positive punishment
(D) Time-out is a form of DRA

8 **A client touches the red card when told "touch red" and does not touch red when told "touch blue." The response is under:**

(A) Response generalization
(B) Satiation
(C) Extinction
(D) Stimulus control

Study aid based on the public RBT Test Content Outline (3rd ed.). Not affiliated with or endorsed by the BACB.

Questions 9–16

Choose the BEST answer.

9 **The plan says to give the client attention every 2 minutes, no matter what the client is doing. This is:**

(A) Extinction
(B) DRA
(C) Noncontingent reinforcement (NCR)
(D) DRO

10 **A family cancels at the door. How should the RBT document it?**

(A) As a cancellation, not as a session
(B) As a full session
(C) As a session to be made up later
(D) As half a session

11 **Data points on a graph going steadily upward across sessions describe the data's:**

(A) Level
(B) Variability
(C) Latency
(D) Trend

12 **Why should preference assessments be repeated regularly?**

(A) The law requires one every session
(B) They identify the function of behavior
(C) They replace data collection
(D) Preferences can change over time

13 **A family prefers that the father be present during sessions for cultural reasons. What should the RBT do?**

(A) Refuse to work with the family
(B) Ignore the request
(C) Change the plan alone
(D) Share it with the supervisor to plan respectfully

14 **Six items are placed in a row; the client picks one, and the chosen item is not returned to the array. Which assessment is this?**

(A) Multiple stimulus with replacement (MSW)
(B) Multiple stimulus without replacement (MSWO)
(C) Paired stimulus
(D) Free operant

15 **The RBT completes all steps of handwashing except the last one, which the client does before receiving praise. This is:**

(A) Forward chaining
(B) Total task chaining
(C) Backward chaining
(D) Shaping

16 **Several toys are freely available, and the RBT records how long the client plays with each, without removing any items. Which assessment is this?**

(A) MSWO
(B) Free operant preference assessment
(C) Single stimulus assessment
(D) Paired stimulus assessment

Study aid based on the public RBT Test Content Outline (3rd ed.). Not affiliated with or endorsed by the BACB.

PRACTICE EXAM 1

Questions 17–24

Choose the BEST answer.

17 **Which situation requires contacting the supervisor right away?**

(A) The session ends on time
(B) The client picks a different toy
(C) The client completes 10 trials
(D) A new self-injurious behavior appears

18 **During a skill assessment, the client hesitates on an item. What should the RBT do?**

(A) Mark it correct and move on
(B) Repeat the item until the client gets it right
(C) Follow the protocol and not give hints unless it allows them
(D) Give a small hint

19 **When facing an ethical dilemma, what is usually the best step after ensuring safety?**

(A) Post the question online with details
(B) Ignore it
(C) Consult the supervisor
(D) Confront the family

20 **A thirsty client says "juice" and receives juice. Which verbal operant is this?**

(A) Mand
(B) Intraverbal
(C) Tact
(D) Echoic

21 **A client loses one token each time they curse. This is:**

(A) Positive punishment
(B) Response cost
(C) Negative reinforcement
(D) Extinction

22 **A client made 12 requests in a 20-minute session on Monday and 12 requests in a 40-minute session on Tuesday. Which measure allows a fair comparison?**

(A) Duration
(B) Frequency
(C) Rate
(D) Latency

23 **A client learned "car" with one picture and now also labels real cars and toy cars. This is:**

(A) Stimulus generalization
(B) Extinction
(C) Maintenance
(D) Response generalization

24 **During a crisis, which procedures may the RBT use?**

(A) Whatever the parent suggests
(B) Any restraint that stops the behavior
(C) Nothing; wait for the supervisor
(D) Only procedures they are trained and authorized to use

Study aid based on the public RBT Test Content Outline (3rd ed.). Not affiliated with or endorsed by the BACB.

PRACTICE EXAM 1

Questions 25–32

Choose the BEST answer.

25 **What is the correct order of a discrete trial?**

(A) SD → response → consequence → intertrial interval
(B) Consequence → SD → response → intertrial interval
(C) Intertrial interval → consequence → response → SD
(D) Response → SD → intertrial interval → consequence

26 **A client earns a reward for every 5 minutes without hitting. This is:**

(A) DRI
(B) DRL
(C) DRO
(D) DRA

27 **During play, a child reaches toward the bubbles, says "bubbles," and the RBT blows bubbles. This is an example of:**

(A) Backward chaining
(B) Naturalistic teaching
(C) Discrete trial training
(D) Shaping

28 **Praise becomes effective for a client after being repeatedly paired with edibles. Praise is now a(n):**

(A) Automatic reinforcer
(B) Primary reinforcer
(C) Conditioned reinforcer
(D) Unconditioned reinforcer

29 **A teacher introduces the RBT as "the behavior analyst." What should the RBT do?**

(A) Agree to avoid embarrassment
(B) Accept the title
(C) Politely correct it and explain the RBT role
(D) Say nothing

30 **A client sees a dog and says "dog," and the RBT responds, "Yes, that's a dog!" Which verbal operant is this?**

(A) Mand
(B) Tact
(C) Echoic
(D) Intraverbal

31 **Which action best protects client dignity?**

(A) Joking about the client's mistakes
(B) Discussing the client's behavior in front of them
(C) Using toddler toys with a teenager
(D) Offering choices and ensuring privacy during toileting

32 **An RBT is charged with a crime. What does the Ethics Code require?**

(A) Self-report it to the BACB as required and inform the supervisor
(B) Wait until there is a conviction
(C) Tell only coworkers
(D) Tell no one

Study aid based on the public RBT Test Content Outline (3rd ed.). Not affiliated with or endorsed by the BACB.

PRACTICE EXAM 1

Questions 33–40

Choose the BEST answer.

33 **The RBT gives three easy requests the client usually follows, then a harder request. This strategy is:**

(A) DRA
(B) Functional communication training
(C) High-probability request sequence
(D) Noncontingent reinforcement

34 **Breaking tooth brushing into a list of small, ordered steps is called a:**

(A) Task analysis
(B) Shaping procedure
(C) Prompt hierarchy
(D) Discrimination procedure

35 **A client earns reinforcement after every 4th correct response. This schedule is:**

(A) Fixed ratio 4 (FR4)
(B) Fixed interval 4 (FI4)
(C) Variable interval 4 (VI4)
(D) Variable ratio 4 (VR4)

36 **Which statement is the most objective for a session note?**

(A) The client had a bad day.
(B) The client was being manipulative.
(C) The client cried for 3 minutes after the tablet was removed.
(D) The client was upset today.

37 **After class, the RBT counts how many spelling words the client wrote correctly on a worksheet. Which method is this?**

(A) Permanent product recording
(B) Momentary time sampling
(C) Whole interval recording
(D) Latency recording

38 **The day after a session, the RBT finds an error in a submitted note. What should the RBT do?**

(A) Backdate a new note
(B) Correct it using the agency's correction process
(C) Delete the note
(D) Use white-out

39 **What is the RBT's role in a functional behavior assessment?**

(A) Write the behavior intervention plan
(B) Design the functional analysis
(C) Decide the function independently
(D) Collect data and assist as directed by the supervisor

40 **Hitting had stopped for several weeks under extinction, then suddenly occurred once again. This is:**

(A) Generalization
(B) Spontaneous recovery
(C) Maintenance
(D) An extinction burst

Study aid based on the public RBT Test Content Outline (3rd ed.). Not affiliated with or endorsed by the BACB.

PRACTICE EXAM 1

Questions 41–48

Choose the BEST answer.

41 **A client hits to get a toy. The plan teaches "toy please" and gives the toy for asking but not for hitting. This is:**

(A) DRA
(B) DRO
(C) Time-out
(D) NCR

42 **A technician tallies every time a client says "hi" to a peer during a 30-minute recess. Which measure is being used?**

(A) Duration
(B) Momentary time sampling
(C) Latency
(D) Frequency (count)

43 **An RBT realizes they forgot to record data during the session but remembers "about 3" tantrums. What should they do?**

(A) Report the missing data to the supervisor without estimating
(B) Record 3 tantrums
(C) Record 0 tantrums
(D) Leave it blank and say nothing

44 **An RBT begins teaching a new skill with full physical guidance and gradually fades to lighter prompts. This is:**

(A) Shaping
(B) Least-to-most prompting
(C) Stimulus fading
(D) Most-to-least prompting

45 **A parent asks the RBT to stop one of the programs. What should the RBT do?**

(A) Refuse and change the subject
(B) Ignore the request
(C) Stop the program right away
(D) Tell the parent they will pass the request to the supervisor

46 **Which is the best operational definition of aggression?**

(A) Showing aggressive intentions during play
(B) Being mean when frustrated
(C) Hitting, kicking or pushing another person with a hand or foot, making contact
(D) Acting angry toward peers

47 **How should paper data sheets be handled between sessions?**

(A) Left on the car seat
(B) Shared with neighbors for safekeeping
(C) Kept secure and out of sight, following agency policy
(D) Thrown in a public trash can

48 **The times written in a session note should:**

(A) Be rounded up to the hour
(B) Be left blank
(C) Match the actual start and end of the session
(D) Match the scheduled times

Study aid based on the public RBT Test Content Outline (3rd ed.). Not affiliated with or endorsed by the BACB.

Questions 49–56

Choose the BEST answer.

49 A client responded correctly on 6 of 8 trials. What is the percentage correct?

(A) 60%
(B) 75%
(C) 68%
(D) 80%

50 The BCBA interviews the parents about when and where problem behavior happens. This is an example of:

(A) Direct observation
(B) Preference assessment
(C) Functional analysis
(D) Indirect assessment

51 A caregiver reports the client slept only 3 hours. What should the RBT do?

(A) Tell the parent it is a medical problem
(B) Cancel all future sessions
(C) Document the caregiver's report and inform the supervisor
(D) Ignore it

52 An interval is scored only if the client stayed on task for the entire 10-second interval. Which method is this?

(A) Permanent product recording
(B) Partial interval recording
(C) Whole interval recording
(D) Momentary time sampling

53 An RBT wants to post a client's artwork on Instagram without the client's name. This is:

(A) Acceptable without the name
(B) Not acceptable
(C) Acceptable in a private story
(D) Acceptable if the art is anonymous

54 To reduce hitting, the RBT reinforces the client for keeping hands in lap. This is:

(A) DRI
(B) DRO
(C) DRL
(D) NCR

55 The RBT asks "What does a cow say?" and the client answers "moo." Which verbal operant is this?

(A) Intraverbal
(B) Echoic
(C) Tact
(D) Mand

56 The RBT says "Say ball" and the client says "ball." Which verbal operant is this?

(A) Mand
(B) Echoic
(C) Intraverbal
(D) Tact

Study aid based on the public RBT Test Content Outline (3rd ed.). Not affiliated with or endorsed by the BACB.

PRACTICE EXAM 1

Questions 57–64

Choose the BEST answer.

57 **An RBT measures the time from the end of one bite of food to the start of the next bite. What is being measured?**

(A) Duration
(B) Inter-response time (IRT)
(C) Frequency
(D) Latency

58 **To help a client choose the correct card, the RBT places it closer to the client than the other cards. This is a:**

(A) Model prompt
(B) Gestural prompt
(C) Verbal prompt
(D) Stimulus (position) prompt

59 **Which schedule is best when a client is learning a brand-new skill?**

(A) Variable ratio
(B) Continuous reinforcement
(C) Fixed interval
(D) Variable interval

60 **Another parent asks how a client is doing. The RBT should:**

(A) Share it if the parent seems trustworthy
(B) Share general progress
(C) Not share information about other clients
(D) Share it without using the name

61 **Showing a visual schedule before transitions to prevent tantrums is an example of:**

(A) A consequence strategy
(B) Punishment
(C) An antecedent intervention
(D) Extinction

62 **An RBT thinks part of a behavior plan isn't working. What should they do?**

(A) Change the plan
(B) Keep implementing the plan and share data with the supervisor
(C) Stop the plan
(D) Ask the parent to decide

63 **An RBT is asked to run a procedure they have never been trained on. What should they do?**

(A) Ask for training and supervision first
(B) Try it carefully
(C) Learn it from an online video and start
(D) Refuse to work with the client

64 **Two items are presented at a time and the client picks one; each item is eventually paired with every other item. Which assessment is this?**

(A) MSWO
(B) Free operant
(C) Paired stimulus
(D) Single stimulus

Study aid based on the public RBT Test Content Outline (3rd ed.). Not affiliated with or endorsed by the BACB.

PRACTICE EXAM 1

Questions 65–72

Choose the BEST answer.

65 **Who designs the behavior intervention plan?**

(A) The parent
(B) The classroom teacher
(C) The supervising BCBA (or BCaBA)
(D) The RBT

66 **A vertical dashed line on a graph between baseline and intervention is called a:**

(A) Y-axis
(B) Data path
(C) Trend line
(D) Phase change line

67 **The supervisor wants to know how long each tantrum lasts. Which measure fits best?**

(A) Frequency
(B) Duration
(C) Latency
(D) Partial interval recording

68 **A client screams when work is presented, and screaming usually results in the work being removed. What is the most likely function?**

(A) Attention
(B) Automatic
(C) Escape
(D) Tangible

69 **An RBT suspects a child is being neglected. As a mandated reporter, the RBT should:**

(A) Report the suspicion as required by law and agency policy
(B) Investigate first to find proof
(C) Confront the parents
(D) Do nothing without proof

70 **A child says "cookie," receives a cookie, and says "cookie" more often in the future. This is:**

(A) Positive reinforcement
(B) Positive punishment
(C) Extinction
(D) Negative reinforcement

71 **A client is injured during a session. What should the RBT do?**

(A) Tell only the parent
(B) Follow safety steps, notify the supervisor and complete an incident report per policy
(C) Write nothing to avoid problems
(D) Wait until the next supervision meeting

72 **An RBT says "Clean up" and records the seconds until the client starts picking up toys. What is being measured?**

(A) Latency
(B) Inter-response time
(C) Rate
(D) Duration

Study aid based on the public RBT Test Content Outline (3rd ed.). Not affiliated with or endorsed by the BACB.

PRACTICE EXAM 1

Questions 73–80

Choose the BEST answer.

73 **Which discontinuous method tends to OVERESTIMATE the occurrence of behavior?**

(A) Duration recording
(B) Whole interval recording
(C) Permanent product recording
(D) Partial interval recording

74 **A neighbor asks the RBT about a child they work with. The RBT should:**

(A) Share only general information
(B) Share without using the name
(C) Share if the neighbor is trustworthy
(D) Politely decline to share any information

75 **A client's parent asks the RBT to babysit the client's sibling on weekends. What should the RBT do?**

(A) Accept if paid separately
(B) Accept if the parent insists
(C) Decline because it creates a multiple relationship
(D) Accept outside work hours

76 **A client throws materials to escape work. The plan teaches the client to say "break please" to get a short break. This is:**

(A) Response cost
(B) Functional communication training
(C) Noncontingent reinforcement
(D) DRL

77 **A parent offers the RBT a $50 gift card as a thank-you. What should the RBT do?**

(A) Politely decline and inform the supervisor
(B) Accept it because it's a holiday
(C) Accept it
(D) Accept it and spend it on the client

78 **Whining is maintained by attention. The plan says to give no attention for whining. This is:**

(A) Extinction
(B) Time-out
(C) DRO
(D) Negative punishment

79 **A student raises a hand far too often. The plan reinforces raising a hand 3 or fewer times per class. This is:**

(A) DRO
(B) DRL
(C) DRI
(D) DRA

80 **A client rocks and hums even when alone in a room with no one present. What is the most likely function?**

(A) Automatic (sensory)
(B) Escape
(C) Attention
(D) Tangible

Study aid based on the public RBT Test Content Outline (3rd ed.). Not affiliated with or endorsed by the BACB.

PRACTICE EXAM 1

Questions 81–85

Choose the BEST answer.

81 **Right after extinction begins, a client's crying becomes louder and longer for a few days. This is:**

(A) An extinction burst
(B) Spontaneous recovery
(C) Generalization
(D) Punishment

82 **Which statement about RBT supervision is correct?**

(A) RBTs supervise themselves
(B) Supervision is optional after one year
(C) RBTs must receive ongoing supervision to provide services
(D) Supervision is needed only when problems occur

83 **On a standard line graph in ABA, the vertical (y) axis shows:**

(A) The client's name
(B) Sessions or days
(C) The names of the conditions
(D) The measure of the behavior

84 **A client says "break please," the work is removed for a minute, and asking for breaks increases. This is:**

(A) Negative reinforcement
(B) Positive reinforcement
(C) Negative punishment
(D) Extinction

85 **An RBT supervising a group of five children looks up only at the end of each minute and records who is engaged. Which method is this?**

(A) Partial interval recording
(B) Momentary time sampling
(C) Frequency recording
(D) Whole interval recording

Study aid based on the public RBT Test Content Outline (3rd ed.). Not affiliated with or endorsed by the BACB.

PRACTICE EXAM 1

PRACTICE EXAM 1 · ANSWER KEY

Answers 1–20

Check each answer and read why it is correct.

1. C BEHAVIOR ACQUISITION **Generalized conditioned reinforcers.** Tokens are paired with many reinforcers, making them generalized conditioned reinforcers.

2. A ETHICS **Decline and inform the supervisor.** Signing someone else's documentation is falsification.

3. D BEHAVIOR ACQUISITION **Progressive time delay.** Gradually increasing the wait before a prompt is progressive time delay.

4. B BEHAVIOR REDUCTION **Attention.** Ignoring withholds attention, so it is extinction only for attention-maintained behavior.

5. A BEHAVIOR ACQUISITION **Listener responding.** Responding to someone's words with an action is listener responding.

6. A BEHAVIOR ACQUISITION **Shaping.** Reinforcing successive approximations of one behavior is shaping.

7. B BEHAVIOR REDUCTION **Leaving the activity may reinforce the behavior.** If the client wants to escape, removing them from the task gives them what they want.

8. D BEHAVIOR ACQUISITION **Stimulus control.** Responding differently in the presence of different stimuli shows stimulus control.

9. C BEHAVIOR REDUCTION **Noncontingent reinforcement (NCR).** Reinforcement delivered on a time schedule regardless of behavior is NCR.

10. A ETHICS **As a cancellation, not as a session.** Billing for services not provided is fraud.

11. D DATA COLLECTION & GRAPHING **Trend.** Trend is the direction of the data over time.

12. D BEHAVIOR ASSESSMENT **Preferences can change over time.** Preferences change, so assessments are updated.

13. D ETHICS **Share it with the supervisor to plan respectfully.** Cultural factors are respected and discussed with the supervisor.

14. B BEHAVIOR ASSESSMENT **Multiple stimulus without replacement (MSWO).** "Without replacement" means the chosen item is removed.

15. C BEHAVIOR ACQUISITION **Backward chaining.** Teaching the last step first is backward chaining.

16. B BEHAVIOR ASSESSMENT **Free operant preference assessment.** Free access and recording engagement time, without removing items, is free operant.

17. D DOCUMENTATION & REPORTING **A new self-injurious behavior appears.** New or severe problem behavior is reported promptly.

18. C BEHAVIOR ASSESSMENT **Follow the protocol and not give hints unless it allows them.** Helping during an assessment makes results invalid.

19. C ETHICS **Consult the supervisor.** RBTs consult their supervisor on ethical issues.

20. A BEHAVIOR ACQUISITION **Mand.** A request controlled by motivation and reinforced by the specific item is a mand.

Study aid based on the public RBT Test Content Outline (3rd ed.). Not affiliated with or endorsed by the BACB.

PRACTICE EXAM 1 · ANSWER KEY

Answers 21–40

Check each answer and read why it is correct.

21. B BEHAVIOR REDUCTION **Response cost.** Removing a set amount of a reinforcer is response cost (negative punishment).

22. C DATA COLLECTION & GRAPHING **Rate.** Sessions had different lengths, so count ÷ time (rate) is needed.

23. A BEHAVIOR ACQUISITION **Stimulus generalization.** The skill occurs with new stimuli, which is stimulus generalization.

24. D BEHAVIOR REDUCTION **Only procedures they are trained and authorized to use.** RBTs use only trained, approved procedures from the plan.

25. A BEHAVIOR ACQUISITION **SD → response → consequence → intertrial interval.** A discrete trial starts with the SD and ends with a brief intertrial interval.

26. C BEHAVIOR REDUCTION **DRO.** Reinforcing the absence of the behavior is DRO.

27. B BEHAVIOR ACQUISITION **Naturalistic teaching.** Teaching built on the child's motivation in a natural situation is naturalistic teaching.

28. C BEHAVIOR ACQUISITION **Conditioned reinforcer.** Reinforcers established through pairing are conditioned.

29. C ETHICS **Politely correct it and explain the RBT role.** RBTs must represent their credential accurately.

30. B BEHAVIOR ACQUISITION **Tact.** Labeling something in the environment, reinforced socially, is a tact.

31. D ETHICS **Offering choices and ensuring privacy during toileting.** Dignity includes choices, privacy and respectful treatment.

32. A ETHICS **Self-report it to the BACB as required and inform the supervisor.** Certain legal events must be self-reported within the BACB's timelines.

33. C BEHAVIOR REDUCTION **High-probability request sequence.** Easy requests before a hard one = high-p sequence (behavioral momentum).

34. A BEHAVIOR ACQUISITION **Task analysis.** A list of ordered steps of a complex skill is a task analysis.

35. A BEHAVIOR ACQUISITION **Fixed ratio 4 (FR4).** A set number of responses = fixed ratio.

36. C DOCUMENTATION & REPORTING **The client cried for 3 minutes after the tablet was removed..** Objective notes describe observable behavior with specifics.

37. A DATA COLLECTION & GRAPHING **Permanent product recording.** Measuring the lasting result of the behavior is permanent product.

38. B DOCUMENTATION & REPORTING **Correct it using the agency's correction process.** Errors are corrected openly through the agency process.

39. D BEHAVIOR ASSESSMENT **Collect data and assist as directed by the supervisor.** The RBT assists; the BCBA designs, interprets and writes the plan.

40. B BEHAVIOR REDUCTION **Spontaneous recovery.** A behavior reappearing after it had decreased is spontaneous recovery.

PRACTICE EXAM 1 · ANSWER KEY

Answers 41–60

Check each answer and read why it is correct.

41. A BEHAVIOR REDUCTION **DRA.** Reinforcing an appropriate alternative behavior is DRA.

42. D DATA COLLECTION & GRAPHING **Frequency (count).** Each instance is counted, so this is frequency.

43. A DATA COLLECTION & GRAPHING **Report the missing data to the supervisor without estimating.** Data must not be estimated or invented; missing data is reported.

44. D BEHAVIOR ACQUISITION **Most-to-least prompting.** Starting with the most intrusive prompt and fading is most-to-least.

45. D DOCUMENTATION & REPORTING **Tell the parent they will pass the request to the supervisor.** Treatment changes are decided by the supervisor.

46. C DATA COLLECTION & GRAPHING **Hitting, kicking or pushing another person with a hand or foot, making contact.** Only the first option describes observable, measurable actions.

47. C DOCUMENTATION & REPORTING **Kept secure and out of sight, following agency policy.** Client data must be stored and transported securely.

48. C DOCUMENTATION & REPORTING **Match the actual start and end of the session.** Session times must reflect what really happened.

49. B DATA COLLECTION & GRAPHING **75%.** 6 ÷ 8 × 100 = 75%.

50. D BEHAVIOR ASSESSMENT **Indirect assessment.** Interviews and rating scales are indirect assessment.

51. C DOCUMENTATION & REPORTING **Document the caregiver's report and inform the supervisor.** Setting events are documented and reported to the supervisor.

52. C DATA COLLECTION & GRAPHING **Whole interval recording.** Scoring only when the behavior lasts the entire interval is whole interval.

53. B ETHICS **Not acceptable.** Client content must not appear on personal social media.

54. A BEHAVIOR REDUCTION **DRI.** Hands in lap can't happen at the same time as hitting, so it is DRI.

55. A BEHAVIOR ACQUISITION **Intraverbal.** A verbal response to someone's words, without matching them, is an intraverbal.

56. B BEHAVIOR ACQUISITION **Echoic.** Repeating a verbal model is an echoic.

57. B DATA COLLECTION & GRAPHING **Inter-response time (IRT).** Time between two responses of the same behavior is IRT.

58. D BEHAVIOR ACQUISITION **Stimulus (position) prompt.** Changing the materials (position) is a stimulus prompt.

59. B BEHAVIOR ACQUISITION **Continuous reinforcement.** New skills are taught with reinforcement for every correct response.

60. C DOCUMENTATION & REPORTING **Not share information about other clients.** Client information is confidential.

PRACTICE EXAM 1 · ANSWER KEY

Answers 61–80

Check each answer and read why it is correct.

61. C BEHAVIOR REDUCTION **An antecedent intervention.** Strategies used before the behavior are antecedent interventions.

62. B BEHAVIOR REDUCTION **Keep implementing the plan and share data with the supervisor.** The RBT reports concerns but does not change the plan.

63. A ETHICS **Ask for training and supervision first.** RBTs work only within their competence.

64. C BEHAVIOR ASSESSMENT **Paired stimulus.** Two items per trial, all pairs presented = paired stimulus (forced choice).

65. C ETHICS **The supervising BCBA (or BCaBA).** RBTs implement plans designed by their supervisor.

66. D DATA COLLECTION & GRAPHING **Phase change line.** A phase change line marks a change in condition.

67. B DATA COLLECTION & GRAPHING **Duration.** "How long" a behavior lasts is duration.

68. C BEHAVIOR ASSESSMENT **Escape.** The behavior ends the task, so it is likely escape-maintained.

69. A DOCUMENTATION & REPORTING **Report the suspicion as required by law and agency policy.** Reporting is based on reasonable suspicion; proof is not required.

70. A BEHAVIOR ACQUISITION **Positive reinforcement.** Something was added and the behavior increased.

71. B DOCUMENTATION & REPORTING **Follow safety steps, notify the supervisor and complete an incident report per policy.** Injuries are reported promptly and documented per agency policy.

72. A DATA COLLECTION & GRAPHING **Latency.** Time from an instruction to the start of the response is latency.

73. D DATA COLLECTION & GRAPHING **Partial interval recording.** Any occurrence scores the whole interval, so partial interval tends to overestimate.

74. D ETHICS **Politely decline to share any information.** Confidentiality applies everywhere.

75. C ETHICS **Decline because it creates a multiple relationship.** A second, personal relationship with the family is a multiple relationship.

76. B BEHAVIOR REDUCTION **Functional communication training.** Teaching communication that gets the same reinforcer is FCT.

77. A ETHICS **Politely decline and inform the supervisor.** Valuable gifts create conflicts of interest; decline and tell the supervisor.

78. A BEHAVIOR REDUCTION **Extinction.** Withholding the reinforcer that maintained the behavior is extinction.

79. B BEHAVIOR REDUCTION **DRL.** Reinforcing a lower rate of a behavior is DRL.

80. A BEHAVIOR ASSESSMENT **Automatic (sensory).** Behavior that continues with no social consequence is likely automatically maintained.

PRACTICE EXAM 1 · ANSWER KEY

Answers 81–85

Check each answer and read why it is correct.

81. A BEHAVIOR REDUCTION **An extinction burst.** A temporary increase at the start of extinction is an extinction burst.

82. C DOCUMENTATION & REPORTING **RBTs must receive ongoing supervision to provide services.** RBTs practice under ongoing supervision.

83. D DATA COLLECTION & GRAPHING **The measure of the behavior.** Time goes on the x-axis; the behavior measure goes on the y-axis.

84. A BEHAVIOR ACQUISITION **Negative reinforcement.** Something was removed and the behavior increased.

85. B DATA COLLECTION & GRAPHING **Momentary time sampling.** Recording only at the moment the interval ends is momentary time sampling.

PRACTICE EXAM 1

Your Results

Find your strong and weak areas.

Score by area

Area	Questions	Correct	%	Review
Behavior Acquisition	21			Cards 29–53
Behavior Reduction	16			Cards 54–72
Data Collection & Graphing	15			Cards 01–17
Ethics	13			Cards 86–100
Documentation & Reporting	11			Cards 73–85
Behavior Assessment	9			Cards 18–28
Total	**85**			

% = correct ÷ questions × 100.

Below 80% in an area?

Study that area's cards again, focusing on the **Tell the difference** and **Exam traps** boxes. Then redo only the questions you missed.

Before the real exam

Aim to score consistently well on both practice exams. Review every wrong answer until you can explain why the correct option is best.
